Change of Business.

THE undersigned respectfully inform the
public that he has disposed of the dry
goods business heretofore carried on by him to
Mr. M. Empey, who will carry on the business
at all his branches on the same premises,
and whom he confidently recommends to the
patronage of his old customers and the public
generally. In returning thanks to his friends
for past favors.
F. F. DILLER,
Bellefleur, June 28, 1876.

CANADIAN BIRDS.

THE EAGLES, HAWKS AND OWLS
of Canada.
BY HENRY G. VENNOR, F.G.S.
OF THE GEOLOGICAL SURVEY OF CANADA.

THIS is the first illustrated work which has
appeared on Canadian Birds. It contains
100 plates of as many different birds, and
the letter-press (100 pages) abounds in new
and interesting facts relating to the habits,
distribution and nesting of these, throughout
the British possessions of America. Price,
strongly bound in cloth, \$1.25.
N.B.—This price barely suffices to cover
the cost of the 100 plates alone.
Orders may be sent to:
DAWSON BROS.,
Publishers,
Montreal.

GILBERT & MAY, DENTISTS,

J. F. LATIMER,
November 3rd, 1875.

Daily Intelligencer.

Death of John Smith's Successor.
On Friday the 28th inst. at 10 o'clock
Albany County, New York, says the
Pittsburgh Gazette, "Smith's Successor,"
the late John Smith, died at the age of
80, without having reached the place of
his birth. When about twenty years of
age, he emigrated from his native land,
and reached maturity near the place of
his birth. He was a member of the Baptist
Church, and was for some time pastor
of the First Baptist Church, corner of Third
and Grant streets. Becoming dissatisfied
with the faith, he, with Alexander Camp-
bell, formed the "Campbellite" or "Chris-
tian" Church, which at one time had a
considerable number of adherents in this
section of the country. Some time after-
ward, according to the faith, they seceded
from the church, and organized a congrega-
tion with him. They went to Cortlandt,
Ohio, where a Mormon congregation was
organized. Then they went to go to
Western Missouri, and finally by per-
secution, were driven to Nauvoo, where
Mr. Smith stayed until within six or seven
months of his death. Hearing of Smith's
death, and that he was expected to suc-
ceed Mr. Campbell, he returned to Nauvoo.
On the day appointed for electing Smith's
successor, Mr. Smith told the congrega-
tion that if he was elected, he would not
accept the office, but would leave the church
and go to the West. He then asked the
audience if they desired to have him for
President, and each man held up his right
hand. A loud shout was heard, and he was
elected. He then returned to Nauvoo, and
was succeeded by Mr. Smith. He then re-
turned to the West, and has been remain-
ing up to the time of his death, a resident
of that place. After coming to this country,
he devoted himself to the study of geology,
and supported himself by lecturing on the
science. He was said to have been much
respected in his community as a law-abid-
ing, courteous citizen.

CANADIAN BIRDS.

The EAGLES, HAWKS AND OWLS

OF CANADA.

BY HENRY G. VENNOR, F.G.S.

OF THE GEOLOGICAL SURVEY OF CANADA.

This is the first illustrated work which has

yet appeared on Canadian Birds. It con-

tains 30 large Plates of as many different birds,

and the letter-press (160 pages) abounds in new

and interesting facts relating to the habits,

distribution, nesting of these, throughout the

British possessions of America. Price,

strongly bound, cloth, \$12.

It is this price largely sufficient to cover

the cost of the 30 plates alone.

Orders may be sent to

DAWSON BROS.,

Publishers,

Montreal.

Daily Intelligencer.

Pasture Shade for Milk Cows.

The question of shade in pastures is being

discussed, and we regret to see it urged

that shade is no benefit to dairy stock, but

on the contrary, a disadvantage, in that

it fosters a kind of lazy inactivity and

thus, by preventing a full consumption

of food, lessens the yield of milk.

The advocates of "no shade in pastures,"

argue that the cow is simply a machine for

converting the food she eats into milk, and

that the more food she eats, the more milk

she will give. They argue that when pastures

are shaded, the cows are kept cool, and

that this is a benefit to them, and that

they will give more milk when they are

kept cool than when they are kept hot.

They argue that the cows are kept healthy

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept healthy

than when they are kept unhealthy.

They argue that the cows are kept contented

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept contented

than when they are kept discontented.

They argue that the cows are kept vigorous

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept vigorous

than when they are kept sluggish.

They argue that the cows are kept active

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept active

than when they are kept inactive.

They argue that the cows are kept energetic

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept energetic

than when they are kept listless.

They argue that the cows are kept cheerful

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept cheerful

than when they are kept sullen.

They argue that the cows are kept content

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept content

than when they are kept discontent.

They argue that the cows are kept healthy

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept healthy

than when they are kept unhealthy.

They argue that the cows are kept contented

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept contented

than when they are kept discontented.

They argue that the cows are kept vigorous

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept vigorous

than when they are kept sluggish.

They argue that the cows are kept active

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept active

than when they are kept inactive.

They argue that the cows are kept energetic

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept energetic

than when they are kept listless.

They argue that the cows are kept cheerful

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept cheerful

than when they are kept sullen.

They argue that the cows are kept content

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept content

than when they are kept discontent.

They argue that the cows are kept healthy

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept healthy

than when they are kept unhealthy.

They argue that the cows are kept contented

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept contented

than when they are kept discontented.

They argue that the cows are kept vigorous

when they are kept cool, and that this is

a benefit to them, and that they will give

more milk when they are kept vigorous

than when they are kept sluggish.

They argue that the cows are kept active

when they are kept cool, and that this is

Trains arrive in Belleville about noon each day.

Daily Intelligencer.
BELLEVILLE, FRIDAY, AUG. 4.

Town and Vicinity.

POLICE COURT.—There were no cases for trial this morning.

PERSONAL.—Mr. J. B. Ashley, editor of the Kingston *Frederic*, is paying a brief visit to town. Our old friend seems to have found residence in the "limestone city" conducive to healthy.

THE DAVENPORTS.—A telegram from Alexandria Bay announces that the yacht *Arcturion* arrived at that point at six o'clock this morning, having made a very fine run.

PERSONAL.—We regret to learn that Francis McManney, Esq., our respected County Treasurer, has been ill for two days past. He is now, however, in a fair way for recovery.

THE HEAT.—Prof. Bell informs us that the thermometer (ordinary) marked 91° in the shade at noon to-day. With this intense heat there is no wind, so that the atmosphere is quite as oppressive as it has been this season.

THE HATED TEAM.—Those who fondly imagined that the "hated team" was over for the season have proved to be mistaken in their supposition. Yesterday's heat was oppressive, and there have been for hotter nights this year than last night proved itself.

DEAD.—We are informed that the young man Kitchin, who a short time ago attempted to commit suicide by hanging in his kitchen in Kingston, has died as a result of the effect of his self-inflicted injuries. Our informant states that the unfortunate young man was buried on the 3rd.

PRESENTATION.—A pleasing incident occurred at the Friday evening meeting of the John Street Presbyterian Congregation. The Rev. Mr. Burton was presented with a purse containing \$100, a mark of their sympathy and affection.

We understand the Rev. gentleman was previously granted a four weeks' furlough.

ROCKETER RACES.—We direct attention to the advertisement of the Oswego Navigation Company, from which it will be seen that they have made complete arrangements for carrying passengers to and from Belleville, at very reasonable rates. The *Belleville* will make her trip to Oswego on Thursday instead of Friday, as usual, next week.

RAPID SHOOTING.—It is worthy of note that the average of the English, who were with the Kingston club at Wimbledon, beating the Canadians badly, was precisely the same as that made by the six of the 40th at Oswego. The conditions were the same in all respects as the Oswego match, except that there was no rain storm at the close of the match, and the marksmen and lower the breeze.

EXCURSION TO THE THUNDERBOLTS ISLANDS.—The *Napago Standard* says: "Arrangements are in course of completion for a mammoth excursion on the *Oswego Belle*, under the auspices of the 'Fraternal Boys' and 'Fraternal Girls' of Kingston, on Thursday, 17th August, the occasion of a visit of the far famed aviators, Moody and Sankey, to the Camp Meeting there."

THE ALLAN LINE.—In our advertising columns will be found details of the running time of the steamship *Crescension* on that route to Derby, and the wonderfully quick time of 7 days, 20 hours and 40 minutes, and to Liverpool in 8 days, 13 hours and 30 minutes. No great has been the reduction in running time made by the numerous lines of ocean steamers, that crossing the Atlantic is now a mere pleasure trip, the average time occupied on the voyage being under 10 days during the summer months. The Allan line is second to none other, its ships being first-class vessels, well found in every respect, and specially courteous officers and attendants are to be found on each ship. Business has no increased, owing to careful and liberal management, that the fleet has been sent to vast proportions, being now one of the most numerous owned by any one company. Persons wishing to go to Liverpool, London, or Glasgow will find the Allan line the most comfortable and advantageous. Tickets can be obtained at the express office from Mr. U. S. Thompson, the courteous and efficient agent of the Company.

THE OLANIA MONTHLY.—This August number of this first-class periodical contains a seasonable table of contents, consisting chiefly of light reading, which is decidedly the most comfortable class of literature for summer perusal. Following is a list of the articles contained in the number: "The Atlantic." At Long as the Lord. A Novel, by F. W. Robinson, Book II. Chapter 3 to 8; The Faithful wife, a Norse Legend; Summer Travel; Kingston and the Thousand Islands; Lake Memphremont; Dreamland, a Poem; How Joint Stock Companies are Manufactured; My Little Fairy, a Poem; The Poetry of Charles Hayre; and The Dark Mountains; Poem.

Woman Before the Mast. The Star of Point. The Divine Law of Obedience. The Climate of Newfoundland. A Foreigner: Song of a Ship. Current Events: Book Reviews: Current Literature: Music and the Drama: Literary Notes: The Atlantic. The Star of Point. The Divine Law of Obedience. The Climate of Newfoundland. A Foreigner: Song of a Ship. Current Events: Book Reviews: Current Literature: Music and the Drama: Literary Notes: The Atlantic.

August Meeting.—The time for the annual display of the "August meeting" is approaching, says a contemporary, and it behooves those who delight to gaze at these colossal structures to prepare for their appearance. These visitors from the interplanetary regions come to enter the atmosphere about the 10th of August, and from that time until the 13th of August, the sky is filled with the most variable in varying numbers. The period of maximum display occurs generally on the 10th of August. They do not come in such multitudinous as the November meteors, but their appearance may be relied on with certainty. The August meteors very rarely miss their appointment on the night of the 10th of August in each succeeding year, and may be seen in all degrees of brilliancy from the glaze of light outshining Venus or Jupiter and moving across the firmament in stately grandeur, while emitting a fiery train, to the hardly perceptible thread of silver light of the smallest shooting star. Their advent will doubtless be watched for by astronomer with interest.

Disastrous Outrage.

A special telegram from Toronto this morning informs us that yesterday afternoon Mrs. Geo. Smith, residing in the seventh census, of Sidney, was returning home from town. When near the farm of James Davis' farm was outraged and abused by a man named John Baker, in the employ of James Davis. The man has left for parts unknown, and Mrs. Smith is lying in a precarious condition, and is expected to die. She will be captured and treated as he deserves.

CRIMINAL ASSAULT ON A FEMALE.

A special telegram from Toronto this morning informs us that yesterday afternoon Mrs. Geo. Smith, residing in the seventh census, of Sidney, was returning home from town. When near the farm of James Davis' farm was outraged and abused by a man named John Baker, in the employ of James Davis. The man has left for parts unknown, and Mrs. Smith is lying in a precarious condition, and is expected to die. She will be captured and treated as he deserves.

From Alexandria Bay.

A special telegram from Toronto this morning informs us that yesterday afternoon Mrs. Geo. Smith, residing in the seventh census, of Sidney, was returning home from town. When near the farm of James Davis' farm was outraged and abused by a man named John Baker, in the employ of James Davis. The man has left for parts unknown, and Mrs. Smith is lying in a precarious condition, and is expected to die. She will be captured and treated as he deserves.

THE CRUISERS.

ALEXANDRIA BAY, Aug. 4.—The *Pericles*, *Katie Gray* and *Syracuse* arrived together yesterday morning at 10:30 a.m. We had a splendid run all the way, and the *Pericles* and *Syracuse* landed and arrived at the *Pericles* and *Syracuse* at 2 p.m. The *Pericles* arrived here at 6:30 a.m. morning, making splendid run all the way down. There are about fifteen yachts here, and we are all anchored together and having a splendid time. The race starts at two p.m.

The *Pericles* and *Syracuse* are entered for the first-class race, to start at 4:30. The wind freshening, and they will stand a good chance.

Croquet.

CAMPBELLFORD, ONT. FRIDAY, AUG. 4.—This game played on Tuesday, was won by the home club by three wickets. E. Bonnycombe, of Campbellford, made a clean hit for eight.

TAKENTOWN, ONT. FRIDAY, AUG. 4.—A match here to-day between the *Pericles* and *Syracuse* resulted in a victory for the latter by three wickets to spare.

LINDSEY, N. PETERBORO, ONT. FRIDAY, AUG. 4.—Lindsay's second innings, 61; Peterboro's, 62, and three wickets down. Majority for Peterboro's, 7 wickets.

MORNING DESPATCHES.

AMERICAN.

Breakage of Ocean Cables.—The telegraph cables between New York and Europe have been broken, and the communication is interrupted.

Commodore Vanderbilt Dying.—The Commodore is expected to die within a few days.

A HEAVY LEAK—SUT.

MORE CAMPBELLFORD.—The game played on Tuesday, was won by the home club by three wickets.

NEW YORK, Aug. 5.—Commodore Vanderbilt is reported in a very precarious condition, so much so that his son, Wm. H. V., was recalled with a view to his care.

A Leavenworth, Kansas, special despatch says that a letter from the U. S. District Court for \$10,733,284 against the Kansas Pacific Railway Company, for using fraudulent vouchers. Ex-Senator Carpenter is among those engaged to prosecute the Company.

A Washington despatch says the Military Committee on the headnote contract that the ex-Secretary Belmont was paid for the contract, taking it away from the Quartermaster General, and he did not give it to be lower bid.

Massachusetts, N. H., Aug. 4.—Governor Cheney has called the attention of the New Hampshire delegation in Congress to the report of breakage of the Ocean Cable, through the carelessness or neglect of masters of vessels, with a request for National legislation providing adequate punishment for the same.

EUROPEAN.

THE EASTERN QUESTION INTERFERED THWARTED.—The Eastern Question is being interfered with by the Russian Government.

Vienna, Aug. 4.—A cable dispatch from Vienna announces that the Russian Government has at last interfered and entered a protest against the present conduct of the campaign for the restoration of the Ottoman Empire, and to the Sultanate Power that under the present system of enlisting volunteers as crusaders against the Christians is stopped. European powers are in the city, and the Russian Government is in the city, and the Russian Government is in the city.

Safe and Harmless. Never sicken, never gripe, always give relief, and for habitual constipation, is one of the advantages of Wyeth's Cathartic Pills.

Commercial.

McKelvey's Patent
SELF-VENTILATING
REFRIGERATORS!
FOR PRESERVING
MEATS,
FISH
FRUITS
VEGETABLES, &c.
It is true that this may only last for a
few hours, or even minutes, but five
minutes is quite enough to do a great deal
of mischief, when a minute at the rate of
two to two and a half minutes—much more
to human beings, but to bristling, roaring
beasts, there are halcyon days, and on the
very morning, which rattled on the roof like
the roof like a discharge of musketry,
with such nearly as damaging an effect, for
several times were broken and tumbled
down, leaving melancholy gaps, like mis-
sing teeth, in the eaves. There are thun-
derbolts, which strike the tallest trees,
leaving them in an instant, and bear and
shred, and shatter, as though cornered, and
suddenly passed over their green and waving
heads. There are flashes of lightning,
which dash through a veritable or
room, and leave everything in it struck
down—leaving a little way up-country, was
nothing to the clouds, but very terrible. There
are all these meteorological possibilities—
rain, probabilities—following fast upon a
burning, hot, still morning, and what
wonder is it that I am anxious and nervous
under every body belonging to me in under
shelter, though shelter, as though cornered,
from the driving rain or tearing gust of wind!
No wall or window, no bolt or bar, can
keep out the dashing death when it comes
down in a violent gale and anches its vic-
tims anywhere and everywhere. A fair
weatherman, telling yesterday morning to
his employer, was in the act of saying, "I
will be sure to come to-morrow," when he
fell forward on his face, from the rain and
flash out of a passing thundercloud.
An old settler a little way up-country, was
reading prayer to his household the other
night, and in a second half the kneeling
circle were struck dead, alongside the pa-
trarchal reader—dead on their knees. Two
young men were playing a game of billiards
quite enough: one was leaning forward to
make a stroke when there came a crash
and a crackle, and he dropped dead with
his cue in his hand. The local papers are
full every day of long lists of casualties, but
it is not from these sources I have drawn
the preceding examples. I only chanced to
hear them yesterday, and they all hap-
pened quite close by.

Chinese Garden Powder.

BELLVILLE, MONDAY, AUG. 7.
CRIMINAL INQUIRY.

This subject, which has acquired an unusual interest in the public mind of late, owing to the liberal exercise of the pardoning power by the Executive, has been gaining the attention of the Canadian Medical Association. Dr. Workman, into Medical Superintendent of the Provincial Lunatic Asylum at Toronto, and on the 2nd inst., carefully prepared paper on the subject, which received the approbation of his brother medicals. There are few men, probably none in this country, who are better fitted for the discussion of the subject than Dr. Workman, who, besides having an exceedingly able gentleman, had many years' experience in the important institution of which he has just assumed the charge. We do not propose to follow the learned gentleman in his lengthy remarks on the subject, further than to state his general conclusion, which is that crime is propagated, like disease, by the contagion of the insane. He states that in the case of the insane it is frequently the result of the exercise of the pardoning power, which is the strongest in our nature. Instancing this, he says that one man in a lunatic asylum in the United States was soon followed by several others, and again, that in 1860 there was a suicidal epidemic over the whole Province, and at the Toronto Asylum one hundred died in hanging themselves. After that, he carefully cut out all accounts of murders and suicides contained in newspapers to which his patients had access, and so prevented the spread of the contagion. The doctor then proposed to the Association to ensure the press for publishing details of murders, and thereby inducing the public mind against the culprits by giving publicity to statements which were not in fact true. The worthy doctor is perfectly correct to some extent in his remarks upon this point, but he would probably be more charitable had he ever occupied the position of a reporter for the public press. In the first place, with all due deference to the learned physician, publishers of newspapers are probably better judges than he can pretend to be, of what news matter they should and what they should not, give place to their columns. As to the rectitude of the information supplied at such times, it certainly cannot be subject for wonder that inaccuracies in detail will occur. The reporter is generally obliged to take his information at second-hand from the best obtainable sources, and to give it as he receives it. It is therefore neither just nor proper that newspapers should be made the subject of harsh denunciation in such matters, for it is impossible to get two percents to tell the same story concerning any exciting occurrence which they may have seen, even when placed in the witness box, with the formality of an informant of newspaper. It is therefore frequently very true statements materially when giving testimony at a trial from what they related to the reporter. How, then, can the press be justly made the subject of censure under such circumstances? Dr. Workman would be wiser to turn his batteries against the persons whose fictions and exaggerations had access to the columns of the newspapers in the manner stated, than to assail those who were necessary in good faith to the maintenance of mischievous or malicious people. Even this would not be just, for the reason before stated, namely that no two persons can agree in every report of a crime, and any exciting occurrence which they may have seen. Variation in detail in such cases is as certain as that no two men can be made to think exactly alike, the mental structure of each man influences the story which he has to tell. For these reasons, we trust that Dr. Workman, and those who agree with him, will either modify their opinions in this respect, or consent to let the reporters for newspapers in such cases for a brief time, when we know that they will be cured of the ideas which at present lead them astray.

This, however, is a digression from the subject proper of our remarks, to which we will now return. Dr. Workman proceeded to recommend the adoption of the French system, which provides that in murder cases where prisoners plead insanity, they are placed in custody under the surveillance of skilled practitioners, who usually detect any sham which may be attempted to be practiced upon the jury. The blunder which shame makes is trying to appear insane, to avoid the genuine madman tries to appear sane. There was a doctor at the trial, who stated that there existed cases of insanity in which the intellectual derangement was scarcely, if ever, apparent. This was probably the worst form of insanity, because it would not show itself in words, but in acts. Though by no means new, this fact acquires additional force from the eminence of the gentleman who reports it. The question then arises, are all murderers insane? And again, ought not one of this class of lunatics who became insane for a brief period only, recovering his usual mental poise immediately after the commission of his crime, to be treated as would a sane and perfectly responsible being? The question is a delicate one, and we are rather inclined to the side of a merciful leniency in determining the mental status of the criminal by the French system, before pronouncing judgment, when there is any doubt in the matter of a murderer's sanity. As the learned doctor put it forcibly, the proof of a lunatic's insanity is only in the subsequent recovery of the patient.

The true explanation of moral insanity, "was only to be found by time, the great

"prover of all secrets and the settler of all doubts, and, in instead of rushing off, fondles to trial with lightning speed and consigning them to the gallows, the authorities of the question of the responsibility was arrived at by patient observation, justice would not be cheated, the law would be directed to the better, and public sentiment would be improved. In conclusion he admitted the epidemic to be no myth, and why it should exist in our Province, the learned gentleman said, "it is a question which has been decided, but at the same time he has been the pupil and the press were much to blame." "The press," he said, "has been the cause of this night, 'the press' of many a guilty subject, and crowd our criminal lunatic asylum with patients who are insane, but it is better, for, if we are to err at all, and escape from error in this matter seems impossible on the side of mercy."

There is only one point more which we wish to touch upon in this connection, and that is this: Dr. Workman declared that McConnell and Ward were both insane, yet our Minister of Justice allows the one to be hung for his crime, and sends the other to Penitentiary for the same crime. Further, he commutes the sentence of Sparham, Davis, Smith (the Sonora murderer), and others, of the same quality of crime, and sends them to the same place. He allows the law to take its course in other cases not a whit more atrocious. Certainly, the pardoning power has been used of late years in a manner to disgust every one who has any doubts as to the rectitude of the government. The doctor and the minister some such scheme as that proposed by Dr. Workman is put into practice. The latter, until that time, there was no uniformity of practice, at least so long as Mr. Hinkley remains in office, and the scandal which his conduct has created will in some unfortunate case lead to the people taking into their own hands the execution of that law which the Minister refuses to carry out. In such instances, as the false witness, or as pleadings of influential friends influence his vacillating judgment. Such a result will be deplorable, but certainly public feeling is taking so strong a shape on the subject that little else can be looked for.

THE STOUT WAR.—The number of hostile Indians does not appear to diminish at the approach of arrangements made for their removal. There are said to be twenty-seven thousand fighting Sioux.

NEW DROVE.—It is said that a combined effort of the United States, London, Montreal, and Bishop Lewis for the erection of a new diocese, to consist of the eastern counties of the Ontario Diocese and the western counties of the Montreal Diocese.

APPOINTMENTS.—The following appears in the *Official Gazette* of Saturday:—James Hinkley, of the Town of Port Hope, in the Province of Ontario, to be a Collector in Her Majesty's Customs. His Excellency the Governor General has been pleased to appoint the Hon. W. B. Richards, Chief Justice of the Supreme Court of Canada, to be Deputy of the Governor General.

VICTORIA RAILWAY.—A telegram from London, Falls on the 5th inst. says: "The first train of cars crossed the Victoria bridge, here, to-day. There are about twenty men laying ties and rails before the train, on which the rails and material are carried. Track-laying is rapidly proceeding. In all, it is estimated that within several miles of the cars are already graded and ready for receiving the ties and rails."

FOREIGN MATERIALS.—Notice is given in the *Official Gazette* that the order in Council passed on the 10th day of June 1860, authorizing the free entry of changeable gauge cars manufactured by the National Car Co., of St. Albans, N. Y., and the material used for repairing them, is rescinded, and that hereinafter all foreign materials imported into Canada for the repair of foreign railway cars disabled en route shall be subject to the duties prescribed by the tariff on such materials.

THE EASTERN TROUBLE.—The news from the seat of war is very conflicting. One account says that the Russians have been driven back to the sea, and that the Bulgarians have been driven back to the sea. Others say that the Bulgarians are meeting with success, and that they have Moukatchev in desperate straits at Tregubine. The Bulgarians have besieged Tregubine, an important point in the south of Hungary, which has been taken by the Turks. Moukatchev, who is in that vicinity, is unable to go to the rescue.

ANOTHER BUREAUER.—The Ottawa Free Press reports our footing up of Parliamentary losses and gains by the respective parties in the general election of 1874, and in the course of the present session. Others say that the Conservatives are meeting with success, and that they have Moukatchev in desperate straits at Tregubine. The Bulgarians have besieged Tregubine, an important point in the south of Hungary, which has been taken by the Turks. Moukatchev, who is in that vicinity, is unable to go to the rescue.

News Condensed.
—Authorial dissent on American fashions, 10 per cent.
—The Mail has started a special early train between Toronto and Hamilton.
—Slight loss of Commodore Vanderbilt's recovery are entertained.
—Archbishop Bourget's gains strength, though he is not yet pronounced out of danger.
—Charges of outrages by the French on the western shore of Newfoundland are again made.
—A laborer named Hauser, employed by Hoffman, Wagon & Co., died from an aneurism at Waterloo on the 5th inst.
—Neil McNeil, driver of a mail wagon at London, was smothered on the 5th, but may recover.
—William Rice, eldest son of John P. Rice, of Bonaventure, was drowned while bathing at Port Darlington on the 5th.

The Local Government have subscribed \$1,000 to the relief of the sufferers by the late fire in Quebec.
—The House of Commons resigned on Friday and a new one was sworn in on Saturday. The reason of the change is not known.
—The stock of new potatoes on the By Ward Market in Ottawa, on Saturday, was so large that they sold as low as 25 cents per bushel.
—Hughes, the Gatineau murderer, and Resseman, the Terbolton murderer, are still at the prison, but slight hopes are entertained of their capture.
—Two burglars were cleverly captured by the police in Toronto on Sunday morning. They were preparing to operate on a jewelry store.
—Three boys were bathing at Pipe's Bridge in Bieleau, on Saturday, when one of them, son of A. Gouley, was drowned.
—A man named Henry Levo was arrested at London on the 5th, with \$13,000 in his possession. He is charged with serious offences.
—The Educational Bill of the Government was carried in the Imperial House of Commons on Saturday after a very warm discussion.

—The agricultural and sewing machine works of Joseph Ploury, Aurora, were destroyed by fire yesterday. Loss \$80,000; no insurance.
—A Paris dispatch says many of the reports from the seat of war are manufactured for the purpose of influencing financial markets.
—A. B. Debon, of Port Barwell, received a musket on the 5th, and lay in an unconscious state for nearly an hour. He seems in a fair way for recovery.
—David Scamblough aged 16, was drowned on the 5th while bathing in the canal near Beatty's saw-mill, at Thorold. The body was found in thirty minutes afterwards.
—The race for the Queen's cup between the *Melbourne* and *Countess of Deffra* has been decided to take place on the 11th, 12th, and 14th inst.

—Mr. Bell, the unfortunate person who received such cruel injuries at the hands of a captain of a barge at Chatham last week, is reported as having expired last evening from the effects of the wounds inflicted.
—There are said to be 18,000 square miles of coal in the Province of Ontario, or about one-third more than in Great Britain, which contains 11,900 square miles. The deposits probably equal all the coal in Europe, Russia not included.
—There has been an increase in the importation of beef into England in the last six months. This year the value was \$280,292, and \$211,915 from slightly raised, and the comparative sums of \$231,467 and \$209,760 last year.
—Mr. Thompson, returning from Napier on the 5th, when near Selby got run into by J. M. Otter, while riding, upon the bridge, and throwing the lady out of her carriage, and severely in several places. Her little girls were also hurt, but not so badly as their mother.

THE PRICE OF FOOD IN OLD TIMES.
Amid the never ending comments on the high price of provisions it is difficult for us to realize the fact that a time existed in Britain's history when wheat, as food for one hundred for a whole year, was sold for a shilling, and the average price of a sheep four-pence. In the reign of Henry I. the price of wheat was raised to six pence in order that the seller might be able to live by it. When wheat was at six pence a quarter, the farthing loaf was to be equal in weight to twenty-four ounces if made of the whole grain and to sixteen ounces if containing solely of wheat. And when wheat was one shilling and six pence per quarter, as it sometimes was, the farthing loaf was to weigh thirty-six ounces, and the whole grain twenty-four. Think of purchasing a pound of good wheat at six pence, and a farthing loaf for a shilling! In the nineteenth century of a sheep four-pence. In the reign of Henry I. the price of wheat was raised to six pence in order that the seller might be able to live by it. When wheat was at six pence a quarter, the farthing loaf was to be equal in weight to twenty-four ounces if made of the whole grain and to sixteen ounces if containing solely of wheat. And when wheat was one shilling and six pence per quarter, as it sometimes was, the farthing loaf was to weigh thirty-six ounces, and the whole grain twenty-four. Think of purchasing a pound of good wheat at six pence, and a farthing loaf for a shilling! In the nineteenth century of a sheep four-pence. MORNING DESPATCHES.

AMERICAN.

TRAIN ROBBERS.

FLOW OF BEER STOPPED.

BAR-KEEPERS AND WAITERS.

ARRESTED.

INDIAN WARFARE.

St. Louis, Aug. 7.—Chief of Police, Mc-

Donoghue, returned from St. Louis, where he

was with Kelly, the suspected train robber.

He says Kelly confessed to him that he was

one of the party and knew the names of other

persons who had been in the train.

There seems to be no doubt now that the whole

party will be arrested within ten or twelve

days.

NEW YORK, Aug. 7.—The flow of beer at

Belleville was stopped last night by the

police, who passed the following order: "No

beer to be sold without license or permit

from the health officer."

The order was issued by the health officer

after a complaint had been made by the

brewery that the beer was being sold

without license.

The order was issued by the health officer

after a complaint had been made by the

brewery that the beer was being sold

without license.

Hudson, Aug. 7.—Last night a train of

passengers, standing on the long branch near Athens

depot, caught fire. Fourteen loaded cars were

destroyed. Loss \$25,000.

NEW YORK, Aug. 7.—The steamship 74

Quincy, from Liverpool, has arrived.

Washington, Aug. 7.—Probabilities in

the Eastern and Middle States, falling

by rising barometer, authority by

the weather bureau, are: rising, heavy

partly cloudy weather, with occasional

showers, especially in the northern portion

of the States.

London, Aug. 7.—Arrived at the steamship

Quincy, from New York.

WHITE HALL, N. Y., Aug. 7.—About four

o'clock Sunday afternoon persons were

driving in the park, when a "box" of

thirteen persons was in a small row boat,

when a small steam tug and the boat was

immediately surrounded, and the boat

was set on fire, and the boat was

immediately surrounded, and the boat

was set on fire, and the boat was

immediately surrounded, and the boat

was set on fire, and the boat was

immediately surrounded, and the boat

was set on fire, and the boat was

Board of Education.

The Board met this evening

Present: Messrs. Newberry, Tennant,

Diamond, Wilson, McGowan, Northcutt,

Wansley, Glasgow and Bell

In the absence of Mr. Newberry, Prof. Bell

was in motion of Mr. Newberry, seconded by

Mr. Glasgow, appointed to the chair.

The minutes of the last meeting were read

and approved.

The Chairman stated that the Committee

on school site for Coleman Ward, had exam-

ined several sites and would be prepared to

report at the next meeting.

On motion, the time for the Committee to

report was extended until the next meeting.

The position which the tem-

perance question occupies in our Dom-

ion politics is far from satisfactory. The

general impression is that the cause has

received much check at the hands of the

present Government. Mr. Mackenzie

has given the country plainly to under-

stand that his Government neither in-

tends to interfere with the liquor traffic,

nor to restrict the question of prohibition

to a popular vote. It is, therefore,

"little or no hope of any legislative action

during the term of the present Parlia-

ment." The Government, however, feels

that it is bound to do something, and

feels entirely safe in thus running coun-

ter to the desires of almost the entire

religious and temperance community

of the country.

The Board follows this up by declaring

that "at the time the Montreal conven-

tion was held last September, there was

a greater enthusiasm throughout the

country than had been seen before for

the cause of a country. The decision of

the Convention, however, seemed rather

to dampen the ardor of the temperance

men, and to restrain their spontaneous

action, than to give it appreciable

political status of the cause. Acting un-

der the advice of its leaders, the Con-

vention did not discuss the expediency

of introducing the temperance question

into politics, but it simply asked in-

formation of the Government, asking

for a prohibitory law, to be sanctioned

by a plebiscite. Naturally, could the

Government said but little head to

this position which it saw that there

was no disposition on the part of the

"ance" to follow it up by electoral action.

This admission fully sustains our inter-

pretation, expressed at the time, of the

effect of the action of the friends of the

Government in the Montreal Convention, in

that they had succeeded in bamboozling

more honest men into the belief that their

propositions would prove effectual in

advancing the cause, whereas their resolu-

tions were simply decided for the purpose of

relieving the Government from the necessity

of being called upon squarely to carry out

or repudiate their past professions. A

year is certainly not a very long time

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

to see how the cause has prospered, and

so brief, so passing, so unimportant, that from beginning to end the book never wears. The author's humor is a delicious light on it all. In mechanical execution the work is done justly, and the binding is neat. Price in cloth \$1.25; paper \$1. To be had from all booksellers.

ARRIVED.—The yacht *Katie Gray* arrived this afternoon after a pleasant cruise of ten days' duration along the Thousand Islands.

BRIN AND THE BRENNAN.—Mr. Brennan's popular comedy company will appear in Quebec this fall for two nights only, on Monday and Tuesday, in connection with the exhibition of a fine panorama of Irish scenery. The merits of the entertainment are too well known to require elucubration, being to favorably impressed by former visits, and we have no doubt that a liberal patronage will be given to Mr. Brennan during his short stay here, the more especially as "Hall actors" have been remarkable for their scarcity this year.

VOTERS' LISTS.—The *Telegraph* says: "The Voters' Lists act provided for a certain number of copies of the Voters' Lists being sent to various persons before the first revision by the County Judge, in order to give full opportunity for their examination. The *Telegraph* (Ontario) authorities have been sent by either 'parent' or 'book-post' registered. It appears, however, that the officers do not permit the registration of matter sent by 'book-post.' Consequently, where, in some instances, municipal clerks have sent the lists by 'book-post' and postmasters have refused accordingly, the packet has gone to Ottawa before being forwarded to its destination. As this may occasion serious delay and thwart the object of the statute, it will be well for municipal clerks in all cases to send the list by 'parent,' in order to secure prompt delivery."

CURIOUS ACCIDENT TO A COW.—Our Bridge-warden correspondent writes, on the 9th: "On Monday week a cow belonging to Mr. Drewry, of this village, went in the morning with other cattle to the woods to pasture, and not returning at night, search was made for her the next day and for several days after by different people, but no signs of the missing animal could be met with, till eventually it was supposed to have been killed by a fox. The fox had been seen in the woods, and the possibility of offering a reward for his recovery was discussed. This morning one of the villagers went to make a thorough search in the woods, and after tramping miles was making a near cut home to the village, and walked across some burnt logs over a small swamp about 12 feet square, and looking down he saw the missing cow, though how she got there was a mystery, for he had to go a mile to the nearest house to get an ax to chop a way out for her. She must have been in on her knees, and after tramping miles west there to drink, appearance indicating that there had been water there, though there was nothing but mud in the place when the cow was discovered. She was got home this evening, a mere skeleton, after being without food for nine days, and though extremely emaciated, it is hoped that with care she will recover."

POLICE COURT.

(Before A. L. SMITH, Esq., J. P.)

THURSDAY, AUG. 10.

VAGRANCY.

Geo. Brown was charged as a vagrant, he having been found in a C. T. freight car this morning. Mr. Crowther appeared for the G. T. P. Prisoner said he got aboard the car at Canaan and thought the car was empty. Fined \$1 and costs ten days.

ROBBERY.

The adjourned case of P. Charbonneau vs. Michael Mahon was proceeded with, and further adjourned for a week.

ANASTAS.

Joe McGovern, James Rhythms, Joe Coira and John Brown were charged with being parties to the assault on James McDonald. Brown was discharged, and the others were remanded for a week.

MORNING DESPATCHES.

EUROPEAN.

THE EASTERN WAR.

CONTRADICTORY REPORTS.

CAPTURE OF SAITSCHAK.

A TURKISH DEFEAT.

LONDON, Aug. 9.—In the Common

House, Mr. Burke, Under-Secretary of

the Foreign Department, in reply to a ques-

tion.—Several representations have been

made to the House regarding the cruel and

atrocious scenes in Bulgaria. The House

has been informed that the recital of those deeds

created in the English mind the greatest in-

dignation and horror. I have reason to be-

lieve that those occurrences caused some little dis-

satisfaction, and punishment is being inflicted by

the Porte upon the perpetrators. A British com-

missioner has been appointed to Bulgaria with

special instructions on the subject of these

atrocities.

LONDON, Aug. 9.—A despatch to the

Standard from the Balkan states that on the

arrived at the Turkish state that the town was

deserted by the inhabitants, only four women

and five children remaining.

Gen. Leuchinsky is to be court-martialed

for not defending the place.

A telegram to the same paper from Tre-

bin reports that Moukhtar Pasha on Tues-

day effected a battle with 30,000 men under

Mustapha Pasha near Bistritza. The Monten-

egroes have abandoned the neighborhood of

Grisia. A portion of their forces have been

sent to the coast near Dubrovnik.

A despatch from Berlin to the *Daily Tele-*

graph reports that a panic prevailed in Bel-

grade on the dismissal of Ristic, and that the

powers will be applied to it to avert ruin.

Positive advice comes from St. Petersburg

that the railways in Russia have been pre-

paring for the possible transportation of

troops. There is no immediate danger, how-

ever, of Russian intervention. Prince Milov-

is ready to negotiate or abdicate.

A Reuter telegram from Vienna announces

that Gen. Tchernyeff effected a junction

with Gen. Horowitz on Tuesday, and has

taken up a position at Banja commanding the

heights.

A despatch from Paris to Reuter reports

that Col. Becker will supersede Gen. Leuch-

insky.

VIENNA, Aug. 9.—The *Political Correspon-*

dence says Moukhtar Pasha has been com-

pelled to place troops on rail stations, and

has slight hopes of success.

SERLIX, Aug. 9.—Gen. Antich attacked

Dervish Pasha near Sinitza, and after three

days' fighting the Turks were defeated.

Rustia, the Serbian frontier, is preparing a

note to be sent to the Powers, giving an ac-

count of the atrocities committed by the

Turks in Servia. The latter are accused of

killing wounded, and of burning villages,

and carrying petroleum in their knapsacks for

that purpose.

AFTERNOON DISPATCHES.

EUROPEAN.

THE EASTERN WAR.

CONTRADICTORY REPORTS.

CAPTURE OF SAITSCHAK.

A TURKISH DEFEAT.

LONDON, Aug. 10.—A despatch from Vienna

says the army which Blum the Serbian

Premier, is preparing, to be sent to the

giving an account of the atrocious scenes

by the Turks in Servia, may serve

equally to pave the way for maligning or

justifying war to the death.

LONDON, Aug. 10.—A despatch from Trebin-

za says the Montenegrins have retired, some to

wards Podgorica, and some towards Ban-

ja. Moukhtar Pasha has made an excursion to

the frontier camp.

An offensive movement of Turks is probable

shortly.

BETHEL, Aug. 10.—The correspondent of

the Milan newspaper *Il Pungolo*, who was

arrested in the Montenegrin camp at Drina

on Tuesday last, has been arrested.

Braza, Aug. 10.—Yesterday a Russian

lady fired a pistol at Prince Orloff, who

was Russian Minister at Belgrade. The Prince

escaped unhurt and the lady was arrested.

CINCINNATI, Aug. 10.—The *Catholic Tele-*

graph of this morning contains an article from

Archbishop Purcell, addressed to the people

of the United States, relative to the attitude

of the Catholic Church towards the public

school system, in which he declares that the

Church has no disposition to interfere with the

system. He further says: "The Catholic

and equity would unite the Catholic people of

this country to exemption from taxation for

the support of other schools, or to a share of

public school funds in proportion to the num-

ber of pupils in the schools, but even this we

are disposed to waive in your favor."

STRAWBERRIES

Received Daily

AT

MR. JACOB S. CROTHERS'.

The Ice Cream Saloon

Is now in full blast and parties can obtain

it either by the glass or quart. Attentive

waiters always present.

SODA FOUNTAIN

Is also in operation, and supplied with all kinds

of syrups.

FINE APPLES.

The Prince of Wales visited the Crystal

Palace at Hyndham on July 10. As he

approached, leading the Queen of the Lakes,

followed by the Princess of Wales, leav-

ing on her brother's arm; an English cheer

went up from the thousands of people who

were in the Palace. The Prince of Wales

was dressed in the King of the Hellenes'

Duchess of Teck, and the Russian Ambassa-

dors the Duke of Teck, leading the Duchess

de Mouchy. As the royal group approached

the Prince of Wales was met by the

Princess of Wales, the Queen of the

Hellenes, and the Duchess of Mouchy

wearing a dress of the Queen of the

Lakes, the Duchess of Teck, and the

Russian Ambassadors the Duke of Teck,

leading the Duchess de Mouchy. As the

royal group approached the Prince of

Wales was met by the Princess of

Wales, the Queen of the Hellenes, and

the Duchess of Mouchy wearing a

dress of the Queen of the Lakes, the

Duchess of Teck, and the Russian

THE INTERNATIONAL YACHT RACE.

The Madeleine Leading.

NEW YORK, Aug. 11.—The yacht *Madeleine*started at 11:17. When last seen, the *Madeleine*was gradually getting away from the *Cunha*.

LATER.

At 1:46 the yacht *Deffrin* behind the *hazy*of *Sandy Hook*, 6 minutes behind the *Made-*line. The *Madeleine* rounded the light ship at2:52, the *Deffrin* at 2:57.

MORNING DISPATCHES.

EUROPEAN.

An Extradition Case.

LONDON, Aug. 11.—John Watson, of New

York, who was extradited by France under

the extradition treaty between that country

and Great Britain on a charge of forgery, was

sentenced to 12 months imprisonment to-day

on the question previously raised before a

magistrate at Guildhall that he could not be

tried, except for the offence for which he was

arrested, under the extradition treaty. The

court for the defence again raised the same

objection, which was held good, and the prisoner

was committed to prison.

PARIS, Aug. 11.—A report of the death of

Duroi, the assassin, proves untrue.

AMERICAN.

The Indian War.

TERRY'S FORCES ADVANCING.

NEW YORK, Aug. 11.—A dispatch from

Terry's camp says that reinforcements under

Gen. Miles arrived on the 3rd, and a forward

movement up the Roseau Valley of Terry's

forces began on the 7th.

Arrived, the S. J. Brown, from South

American ports.

THE EASTERN WAR.

Servia Still Defiant towards Turkey.

The Porte willing to Negotiate for Peace.

PARIS, Aug. 11.—The *Standard* says that

Gen. Tchernyeff is advancing in the direc-

tion of Banja.

A Reuter telegram from St. Petersburg says

Gen. Horvath has been ordered to march on

Banja, where he awaits reinforcements.

Gen. Despotovich, the new Commander-in-

Chief of the Bosnian, announces that he has

taken seven Turkish encampments, and occu-

pied several villages on the Vuk.

PARIS, Aug. 10.—A dispatch to *Le Temps*

from Vienna states that the Serbian Premier,

Ristic, rejects all offers of mediation, declar-

ing that Serbia will not treat for peace until

Banja is under the walls of Belgrade.

LONDON, Aug. 11.—The *Standard*'s Berlin

special says the Porte has positively declared

it will not negotiate for peace until Banja

is under the walls of Belgrade. The thoughtful

powers are disposed to intervene, but not

willing to agree to an armistice before the

entry of the Turks into Belgrade.

PARIS, Aug. 11.—The *Liberte* says the

Sultan is better, and his recovery is

nearly certain.

AFTERNOON DISPATCHES.

LONDON, Aug. 11.—The *Daily News* has

a dispatch from Belgrade which says the

Turks are about to enter the city. The

Pacha is pushing westward from Gurguvats,

and the Serbian General Horvath has

fallen back on Yankovo and Kiskers.

LONDON, Aug. 11.—The *Daily News* has

a dispatch from Belgrade which says the

Turks are about to enter the city. The

Pacha is pushing westward from Gurguvats,

and the Serbian General Horvath has

fallen back on Yankovo and Kiskers.

LONDON, Aug. 11.—The *Daily News* has

a dispatch from Belgrade which says the

Turks are about to enter the city. The

Pacha is pushing westward from Gurguvats,

and the Serbian General Horvath has

fallen back on Yankovo and Kiskers.

LONDON, Aug. 11.—The *Daily News* has

THE INTERNATIONAL YACHT RACE.

The Madeleine Leading.

NEW YORK, Aug. 11.—The yacht *Madeleine*started at 11:17. When last seen, the *Madeleine*was gradually getting away from the *Cunha*.

LATER.

At 1:46 the yacht *Deffrin* behind the *hazy*of *Sandy Hook*, 6 minutes behind the *Made-*line. The *Madeleine* rounded the light ship at2:52, the *Deffrin* at 2:57.

MORNING DISPATCHES.

EUROPEAN.

An Extradition Case.

LONDON, Aug. 11.—John Watson, of New

York, who was extradited by France under

the extradition treaty between that country

and Great Britain on a charge of forgery, was

sentenced to 12 months imprisonment to-day

on the question previously raised before a

magistrate at Guildhall that he could not be

tried, except for the offence for which he was

arrested, under the extradition treaty. The

court for the defence again raised the same

objection, which was held good, and the prisoner

was committed to prison.

PARIS, Aug. 11.—A report of the death of

Duroi, the assassin, proves untrue.

AMERICAN.

The Indian War.

TERRY'S FORCES ADVANCING.

NEW YORK, Aug. 11.—A dispatch from

Terry's camp says that reinforcements under

Gen. Miles arrived on the 3rd, and a forward

movement up the Roseau Valley of Terry's

forces began on the 7th.

Arrived, the S. J. Brown, from South

American ports.

THE EASTERN WAR.

Servia Still Defiant towards Turkey.

The Porte willing to Negotiate for Peace.

Late Turnips for Stock

It is generally conceded that farm stock requires some excellent food in winter in order to keep healthy. The turnips are usually considered more nutritious than turnips, but they cost much more to raise, and do not succeed in all kinds of soil, or so wide a range of country as the several varieties of turnips. This season a group of farmers near the city have raised a variety of turnips, and the result is very satisfactory. The turnips are of a fine quality, and are well adapted for stock. They are of a fine quality, and are well adapted for stock. They are of a fine quality, and are well adapted for stock.

It is now time to get ready for a crop of fall turnips, and we will venture to say that there is no farmer in the country who has not at least one acre of land upon which a supply of these valuable roots may be grown before the ground freezes in the fall. We will also venture to say that his cattle next winter will be made more comfortable, and come out in the spring in better condition if given the turnips they will eat than if they had corn or none. The expense of raising the late turnips is a mere nothing, and the profit is a very large one. The turnips are of a fine quality, and are well adapted for stock. They are of a fine quality, and are well adapted for stock. They are of a fine quality, and are well adapted for stock.

Liberal Conservative Demonstration in Belleville.

The members have been in Utah twenty years.

-Owing to climatic changes, the odors of Lebanon are being dispelled.

-Rotten wood 2,000 quarts of ice cream a day during the summer months.

-The military situation in the East is unchanged.

-Several deaths from sunstroke occurred in Ontario and Quebec.

-Cordillars are reported scarce from the Grand Banks.

-The Imperial Parliament was to be prorogued this afternoon.

-Hon. Mr. Blake will sail from Liverpool on the 17th.

-There is another unrelenting report of the defeat and winning of Sitting Bull by Gen. Terry.

-In hot weather hang a wet horse rug or blanket over the door or window facing the wind, and the room will become cool.

-A stroke of lightning in Newmarket, N. H., destroyed a large quantity of hay.

-A collision between railway trains occurred at London on the 14th. One of the locomotive drivers had his leg broken. No one else was injured.

-John McLean was drowned while bathing in the Ottawa at Amherst on the 12th. It is supposed he received a sunstroke while in the water.

-The first load of barley this season was purchased on the Niagara market on Saturday at sixty cents per bushel. It was a good sample but light in weight.

-General Crook and Terry have at last returned after the Sioux. A despatch from them in Montreal indicates that the war is over.

-A very destructive rain-storm visited the township of Bayview, in Elgin, on Saturday. More than twenty bridges were swept away, and the Ottawa River rose to a great height, higher than has been known for twenty years.

-Great Britain's public debt has been reduced since 1858 from \$299,919,250 to \$175,356,800, or about one-third.

-The total amount of wheat, however much greater, for in the same eighteen years a new field was contracted amounting to \$28,650,441.

-Phenomena of a Pennsylvania Hall Storm.

-The storm was a perfect fury, and the lightning was a perfect fury.

-At night we were at a farm house just at the foot of the hill, a spur of the Blue Mountains, that is near the boundary of Northern Berkshire.

-The house was a perfect fury, and the lightning was a perfect fury.

-The house was a perfect fury, and the lightning was a perfect fury.

Daily Intelligencer.

WEDNESDAY, AUGUST 16, 1876.

Town and Vicinity.

SECTION.—R. H. Innes, Harrisburg, Texas, sends a correct solution of Enigma No. 40.

BATH.—Hot and cold baths at Thompson's factory, West Belleville, at ten cents each.

SARABAT SCHOOL.—The annual picnic of St. Thomas' church Sabbath School took place to-day.

CIVIC HOLIDAY.—Trenton had her civic holiday yesterday, and a large excursion party from that place took a trip down the Bay on the *George Bell*.

PERSONAL.—Judge Nelson, who retired the notorious Rochester case, is staying with some friends at Niagara, and went down there on the *George Bell* on Sunday last.

FOR PHILADELPHIA.—Amongst the visitors to the centennial who left town yesterday were Messrs. Geo. C. Holton, Collector of Inland Revenue, and John J. B. Flint, Esq.

COMING.—A telegram was received by Mr. W. H. Campbell this morning, informing him that the Kingston yacht *Emmet* will take part in Friday's race. It is to be hoped that the *Fitz* will also come.

COOLING.—The air was decidedly cooler yesterday afternoon and to-day owing probably to thunder showers which fell at some little distance away. Such a change in temperature is highly agreeable, and it is to be hoped that it will continue.

GETTING READY.—The yachts are being got ready for Friday's race, the washing of bottoms and black-lacing of the same being in order. There can be little doubt that the boats will all be in good trim, and a close contest may be looked for.

THE "ZEPHYRUS."—The Brockville Record of the 15th says—"The *Zephyr*, of Belleville, owned by Prof. S. T. Greene, of the Daaf and Dand Institute, of that place, came into port last night, S. S. Walbridge, Geo. F. Hope, and E. O. Fonten, accompany the yacht."

INTERCOLLEGIATE RAILWAY.—The Messrs. Dawson Brothers have just issued a large and handsome volume, liberally illustrated, containing a complete history of the Intercollegiate Railway, by Sanford Fleming Esq., Chief Engineer of that and other Government Railways. The book is full of interest, and as an important and authentic contribution to our country's history it ought to have a large circulation.

SON SPOKE.—The following hint, sent by Dr. D. F. Macdonald to the Edinburgh Standard, may be some use to our out-door laborers who put fern, turnip or cabbage leaves inside their hats, or wind a band of rashes, vetches, or green herbage of some sort around them, there would be fewer cases of sunstroke. By this means the heat is not only greatly lessened, but actually guarded against by the cooling effect of the herbs.

NEWSPAPERS AS INFLUENCES.—There is scarcely a newspaper published from one end of the year to the other that will not, if critically considered, give offence to somebody in the community. The political objects to the way in which it is reported. The buyers of one set of shares are offended because the money column reports another set as going up or going down. Gentlemen who find themselves in the hands of the police are grieved at the license of the press which reports their arrest and trial among the police proceedings. The sympathizer with Turkey is offended at letters from Belgrade, and the believer in Servian conquests is offended by despatches from Constantinople. The newspaper thus offends some one, just as the weather—rainy to-day and sunshine to-morrow—is sure to annoy somebody. The common sense view is that the newspaper is the history of yesterday written to-day; that it is the mirror of the time, and that those who conduct it care nothing for individuals, except to do them justice.

SMALL FRUIT MEASURES.—Berries and other small fruits are sold, as everyone knows, very largely by the quart measure. By reason of the fact that the Imperial quart is the only measure of capacity allowed, though the Winchester quart has been tolerated for use in cases of special agreement, provided it had been duly stamped and satisfactory proof of the agreement furnished. The old wine measure, which, even before the passing of the Act, was illegal, is not now allowed on any consideration, and those who persist in using it render themselves liable to a fine. Many of them are still in use, any one can see for himself, and the wine measure quart contains only about five-sixths of the quantity measured by an Imperial quart. Quantity measures are by an Imperial quart, whether they are being checked or not. Dressed dealers, also, who are underselling

To comply with the Act should make a point of exposing the fraudulent proceedings of those who, by using a small illegal measure, are trying, in many instances successfully, to undersell them.

DOMINION RIFLE ASSOCIATION.—The Dominion Rifle Association competitions will take place at Ottawa, commencing on Tuesday, the 6th of September next. Competitors will be carried over the Intercolonial and Grand Trunk Railways at one fare for the round trip.

THE PUBLIC SCHOOLS.—As will be seen by reference to the report of last night's proceedings of the Board of Education, the opening of the Public Schools has been postponed until the 22nd inst., and the holding of the school picnic has been put off until the 25th. The latter movement is a consequence of the former, which is, considering the extreme heat of the month, a wise determination on the part of the Board.

Board of Education.

A special meeting of the Board of Education was held in the Council Chamber last evening at 8 o'clock.

Present.—Prof. Bell, Jas. G. Ross, W. W. Young, T. McMillan, I. Diamond, J. Macdonald, Wm. Tennant, Dr. Tracy, Dr. Wilson, R. Newbery, and Rev. Mr. Burke. In the absence of the Chairman, Prof. Bell presided over the meeting.

The Minutes of the last meeting were read and approved.

REVISION, &c.

An application was received from Mr. Malcolm, of Ottawa, in relation to the situation of the school also from W. E. Sprague, dated at \$500 and last at \$600, also from Chas. H. Irwin.

Mr. S. S. Carman's account for printing, amounting to \$24.00, was reduced to \$1.00, and referred to the Finance Committee.

Mr. Glas presented a report relative to the action taken in the picnic, and reported favorably. The picnic had been successful, and the picnic would be held on the 25th.

Moved by Mr. Newbery, seconded by Mr. Wesley, that the report of the Public Schools be extended to the 22nd August—Carried.

Mr. Johnston read a communication from the School Examiner at Trenton, relative to the request for a permit for Mr. McCoy, which was refused.

Moved by Mr. Newbery, seconded by Dr. Tracy, that in the report of the Public Schools be extended to the 22nd inst., and that when adjourned it stands adjourned until that date.

The matter of delaying the opening of the schools was ordered to be advertised in the papers, as was also the want in No. 1 School. Board adjourned.

Police Court.

(Before A. Diamond, Esq., P. M.)

John Bonner, an old offender, was brought up on the charge of being drunk, and was remanded for a week.

ARRAIGNED.

Samuel Graves charged Benjamin Frink with the use of an offensive weapon, and was remanded for a week.

Marine Notes.

Kincardine.—Cruiser Ross, 2 brk. mvels, 1 crane, 2 crabs, 2 crabs.

Arrivals Reported at Customs House.

Per G. T. R.—Recently & later, 1 ship sugar; J. C. Fraser, 1 case; J. Lewis & Co, 10 kegs salt.

Express.—Miss Ackerman, 1 box; E. Harrison, 1 bbl.; J. Gallagher, 1 bbl.; Fish, R. P. & Co, 10 kegs salt.

In our day, both married and single people live too fast. A bachelor now has a house of his own, and a family to support. He has a wife and children, and a household of his own. He has a family to support, and a household of his own. He has a family to support, and a household of his own.

FROM QUEBEC.
THE WEATHER.
SLIP AND PONTON REMOVED.
GREAT FIRE.
LOSS \$100,000.

QUEBEC, Aug. 16.—There has been most agreeable change in the weather here, and the atmosphere is much cooler, only 65°; there has been no rain except one heavy shower yesterday.

The corporation have removed the slip and ponton used by the boatsmen at the Fairway market, the latter persisting in their refusal to take out licenses.

The steamship "Columbia," from Glasgow, arrived with 26 passengers and a general cargo.

A fire broke out at 12:30 this morning at Levis, in the Hospital of Andre Brochu, which was undergoing repair, could not be got to work at the burning house until 2 o'clock.

The Quebec steam firework-makers 3 o'clock and succeeded in getting the fire burned out. Twenty-five houses were burned. The loss is estimated at about \$100,000; partly insured.

MORNING DESPATCHES.

EUROPEAN.

THE EASTERN WAR.

TOCHNAVEFF'S STRATEGY.

LONDON, Aug. 16.—A despatch to the *Daily News* from Cairo asserts that in the battle of Kuti the Turkish numbers 2,000 and the Montenegrins 1,000.

The Vienna correspondent of the *Times* writes that military critics approve of Tchernavetz's strategy, and declare that inferiority of numbers does not obligate him to abandon Turkish territory and stand still.

He evacuated Gargavatz and Satcha, and is expected to withdraw from the whole line of the Timok, drawing the Ottomans to follow him through the gorges between the valleys of the Timok and Morava. He has an army of 60,000 equipped with strong positions from Alexander to Parahin. The Turks have 100,000 men divided into three armies. It remains to be seen whether the Turks will attack the Servians or march north, leaving the Servians behind.

A despatch to the *Daily Telegraph* reports that the English Consul at Belgrade and Constantinople been directed to inform the Servians and Turks respectively that if they will consent to mediation of the Powers, England is willing to act.

AMERICAN.

Bloody Affray in New York.

NEW YORK, Aug. 16.—In a fight among laborers in 56th Street yesterday, Hugh Fitzpatrick, Jas. Clifford and John Harkins were dangerously hurt by Patrick Kelly, who was brought up on the charge.

AFTERNOON DESPATCHES.

ATLANTA, Ga., Aug. 16.—A negro raped a fourteen year old school girl in Fayette County on Monday, and was killed by the steam locomotive.

NEW YORK, Aug. 16.—Arrived, the steamer *City of New York*, Havana and Canada from Havre.

LONDON, Aug. 16.—A despatch from Constantinople says that the Turkish Government has decided to send a mission to the Sultan of Morocco, and to negotiate a treaty of commerce and friendship with him.

London, Aug. 16.—A despatch from Constantinople says that the Turkish Government has decided to send a mission to the Sultan of Morocco, and to negotiate a treaty of commerce and friendship with him.

Waste of Butter in Cheese Mak-

ing.

We find the following in the Rural New-

Yorker of last week:

A correspondent writes us that he has

difficulty in cheese making. "The top

layer of milk in the curd is too thick,

at times, very soft and tender, and in cut-

ting and working the curd, the oil or fat

separates off the whey." We have no doubt

that this is the case, and the reason for it

is, we presume, that the milk is not well

stirred, and the cream, or perhaps the tem-

perature of the milk is too high and too little

cream is used, and thus the cream ac-

cumulates to excess in the top layer of milk.

After the cream is added to the milk and

up to the time coagulation begins, the bot-

tom part, or the cream of the milk, is ob-

eying the law of gravity, and is pro-

ceeding to rise toward the surface—some-

times, if the coagulation be delayed, collect-

ing so as to form a stratum of cream.

The curd of "whole-milk" consists of all

the cream or cream proper of milk, as well

as the whey. Now, if it is the case, in the

case which imports to our case, and in the

case of the curd, the cream of the milk is

not well stirred, and the cream, or perhaps

the temperature of the milk is too high and

too little cream is used, and thus the cream

accumulates to excess in the top layer of milk.

After the cream is added to the milk and

up to the time coagulation begins, the bot-

tom part, or the cream of the milk, is ob-

eying the law of gravity, and is pro-

ceeding to rise toward the surface—some-

times, if the coagulation be delayed, collect-

ing so as to form a stratum of cream.

Daily Intelligencer.

You Ask me How I Live.

By JOSEPH HUBBARD.

From Pen and Pencil.

Living frugal, feeling kindly.

Acting fairly to all men.

What may be the result?

Heeding none, but to the end.

Wearing none but the best.

Thus I live—and this my creed.

March continued, Res. continuing.

Let little children say.

One word we will know.

In words a torrent of abuse:

One thing he is calling me bad.

Add but darkness to their night:

Let them improve their lives.

Let thy goodness be his light.

I have felt and known how bitter

Human souls make the world.

Every bosom round me rears,

Still my heart with kindness teases

That when they are all gone

And my ears a tear-drop find

At the thought of my sin.

Ah! be kind—live with no secret

For our happiness is all one.

Kindly hearts are seldom all one.

Cultivate in Season.

The truth of the following cannot be too

strongly enforced.

"With a press of work often the cultivation

of food crops is put off until the weeds

have obtained a considerable size, even so

as to overshadow the crop. This is a mis-

take. Every seed not destroyed is sowing

the ground of the nutriment that is just in

the best condition for the growing plant,

but if the weed is destroyed as it comes out

of the ground it has no only taken the

nutriment from its own seed, but

injection, when weeds are tiny, will destroy

them, where, if allowed to remain a con-

siderable time, such individual specimen will

require the same effort. Here is where the

farmer in time and money may be saved.

This is especially true in the growth of

oats, clover, and other crops closely

sown. Weeds require to be entirely

destroyed. In the case of potatoes, the plant of harvesting

after planting and before they are far ad-

vanced is growing in favor. This allows

the crop to have a good start of the weeds,

and the potatoes are not in the least injur-

ed by the harvest.

Worms in children.

Worms in children, if neglected, lead to

fatal results. If a child does not sleep well,

is irritable and nervous, keeps picking its

nose, and is generally in a bad way, it is

not positively sick, it has worms, and

nothing will relieve it, so speedily, and ef-

fectly, as WORM'S EXPELLER.

PUBLISHED SATURDAY, AUG. 26.
The Demonstration.

It affords us pleasure to learn that the
Conservative of Prince Edward are erecting
themselves to stand in yielding the
great Conservative demonstration, which is
to take place here on the 12th of Sep-
tember, a success. The Prince Edward in-
forms us that the Committee have made
arrangements with the following steamer,
viz: *Ontario Belle, Annapolis and Norfolk*,
to convey passengers from Kingston and
all other ports to the city on Tuesday, the
12th of September next. We may add
that the members of the local Committee
are exerting themselves to provide for all
who may attend, and it is to be hoped that
Prince Edward will be well represented on
the occasion.

The "Times" on British Columbia.

A cable dispatch to the Toronto *Globe*
gives the following editorial from the
London *Times* of the 23rd inst. on British
Columbia and the position of the Canadian
Pacific Railway: "At this crisis of the
Confederation Lord Dufferin intervenes,
and visits Vancouver's Island to inquire
into the actual position of the British
Columbia's bargain has been broken
and the subsequent compromise repudiated.
These events forming a scandalous chapter
in Canadian history. The Pacific Railway
being promised, the British Columbia
entered the Dominion. Sir Hugh Allan's
operations involved the Macdonald Minis-
try in ruin; Mr. Mackenzie, embarrassed
by financial difficulties and Canadian dis-
content, threw the Pacific Railway scheme
aboard. The *Times* then gave the history
of Mr. Mackenzie's negotiations with
British Columbia, and says the Columbian
are undignified. Section, however, is a
political impossibility. The Colonial
Office can only exercise moral pressure on
the Dominion Government, but such
pressure must be firmly and energetically
applied. The Canadians must be told that
they are playing for high stakes with a
solemn engagement, jeopardizing their
young national credit, and discrediting the
English name of which they profess to be
proud."

DEATH BY SHEEP.—News from Australia
states that the cold season in Victoria has
been very disastrous to squatters. Two
million sheep died in the River Ina for
want of grain.

A FAIR REPORT.—A telegram from
Victoria, B.C., says that the truth in the
report from San Francisco that the Gov-
ernment-General said the Canadian Pacific
Railway is to be dropped. His Excellency
assured the deputations that the main line
would be vigorously prosecuted.

HOMES FOR THE CENTENNIAL.—Fifty-
four homes from Toronto for the Centennial
Exhibition, left Toronto for the West last
night. They are to be fine and
valuable animals. The shipping of the cattle
for the Centennial will take place on the
15th September, and of sheep and swine
on the 4th October.

GUT OF WHEAT.—The Welland Rail-
way Company have at present, it is said,
a perfect glut of wheat at the present
Port Colborne, some twelve vessels having
arrived there last week and delivered 200,
000 bushels. It is expected that it will
take about a week's work to ship it over
the road. Train cars are running night
and day to get it to its destination at Port
Dalhousie.

G. W. RAILWAY RETURNS.—The work-
ing record of the Great Western Railway
for June shows that while June last year
produced a loss of \$20,000, this year has
shown a profit of \$50,000. The total
passive gain is \$100,000. The traffic in
June, 1876, increased only \$10,000, but
the expense having been reduced by \$40,
000, the additional profit is, as above stat-
ed, \$50,000 in the month.

THE LUMBER TRADE.—The North-West-
ern Lumbermen of the 12th inst. claim that
Michigan log exporters have commenced
preparations for next winter's campaign
and are taking light stocks, unless there
should be a decided change in the price of
lumber. The week's receipts were 35,121,
000 feet, about 10,000,000 less than the last
year. This decrease, which has varied
little for several weeks, is an encouraging
feature in the trade for those who are
waiting for a rise in the empty freight
operators to a sense of the situation.
Cargo prices remain without change
variations, and probably will not change
until an advance is made.

AUTUMNED WHEN.—Those who
drink the most expensive wines, in the
hope that deleterious agents if they are
present in very small proportions, will be
shocked to hear that they may be uncon-
sciously saturating their system with fuel
oil, kerosene, &c., and that the poor
man who drinks the vilest gin or
whiskey, is now saved, on the authority
of Dr. Desnoes, of Paris, that those wines
known as Chateau and the Eau de
Marine and Carmine are the most
poisonous of the same class as kerosene,
and contain the same essential oils. It is true
these fashionable liquors, being very dear,
are patronized chiefly by the upper classes,
and consequently the amount of the public
alcoholism they cause is not to be compared
with the cheaper and commoner brands,
but their effect on the human constitution is
none the less baneful, and Dr. Desnoes
gives several cases of confirmed alcoholism
produced by Chateau and Eau de
Marine which have come under his notice.

Consumption of Timber.

Mr. James Little, gentleman who is well
known in the lumber trade, has recently pub-
lished some interesting statistics regarding
the consumption of timber. He predicts a
very early and a very large supply of
Canada, but if the cut in future is to
be greater than that of the present season,
Mr. Little's predictions will prove
very wide of the mark. Little gives
some interesting facts concerning the con-
sumption of timber in the States. He
says:

The census of the United States of 1870
referring to the use of wood, reports 50,
838 establishments manufacturing articles
made entirely from wood, employing 380,
387 persons, and using material worth
\$200,921,400 annually. There are besides
100,912 industries in which wood is an im-
portant part; for example, carriages, fur-
niture, bridges, ships, &c., employing 1700,
815 persons and using material worth \$488,
504, 844. There are 72,633 miles of rail-
road in operation, and the addition of double
tracks and sidings will probably increase
this amount considerably. Supporting the
life of a sleeper is seven years, the 50,
000 miles of track consume yearly, 34,
000,000 sleepers, or thirty years growth on
34,000 acres of the best natural wood land,
and the cost is \$1,000,000. To build 700,
000 miles of track would require, planted
with trees best adapted to the purpose,
regularly chopped and scientifically man-
aged to supply the railroad already con-
structed. At least 125,000 miles of fencing
are required to enclose the railroads of the
country, which would not have cost less on
an average than 700 dollars per mile. One
half of this would be supplied by the
wood employed or 43,000,000 of dollars,
which they must take lumber annually to
the value of not less than 18,000,000 of
dollars to keep them in repair.

By the last return I have seen there was
in operation in the United States 63,000
miles of telegraph, which destroyed in their
construction 1,600,000 trees for poles,
while the annual repairs must cost for 200,
000 miles of telegraph, 1,000,000 of dollars.

The 20,000,000 of masts manufactured
in the United States annually require,
according to Mr. March, 200,000 cubic
feet of the best pine lumber (equal to about
3,000,000 feet of spruce), which necessitates
the lowering of her hulls, which got
under her fore-foot and lost her at least
half a mile. The *Perleus* meanwhile over-
hauled the *End*, and rounded the North-
rop's buoy considerably distant in ad-
vance, whilst the *Surprise* had picked up
some of her lost ground. The *Lady*
Blanche had steadily fallen behind, and
was to all intents and purposes out of the
race, retiring after exchanging the point of
view. The three leaders, as they headed by
the wind for the long beat to Redwin-
ville, reefed up, and the *Perleus* and *End*
reduced their head sail to storm jibs, but
Surprise hung on doggedly to her full
jib. At this time the *Surprise* was
heavy, terrific puff blowing down on the
smart racers, which stood up well to their
work and made rapid progress through the
heavy choppy sea, sending the spray to
their eyes, heads and shoulders, and
making a barrel of water. Here the *Surprise*
did splendid work, weathering on her op-
ponents, and finally passing *Massachusetts*
with a lead of half a mile, *Perleus* second,
and *End* a good third, though apparently
falling slightly gradually. The *Surprise*
was bothered by a tug and tow just below
the point, and then, considering by failing
to weather them, having to pass to leeward.
Up the Bay the struggle continued, the
three leading at times, Bellevue passed
by the *Surprise* leading by, varying
accounts say, from half a mile to a
mile. All this advantage was lost in two
tacks west of the town, and the *Perleus*
succeeded in passing the *Redwinville* first
by some two minutes or more. Vic-
tory was thus matched out of the fire as it
were at the last moment, and Mr. Roy's
black favorite swept along, increasing her
lead on the run down, and passing the win-
ning mark, winner of the first prize at
2:37:15, the *End* following at 2:41:
00, or just 3 minutes and 10 seconds be-
hind. The *End*, not timed, was about
40 minutes later in arriving, having sailed
a good race. A fast race was sailed
on the bay, the winning boat making the
journey in 4 hrs. 17 min. 15 sec. Her
speed was thus nearly 12 miles an hour,
the distance actually sailed being about
50 miles. We have to say that the
race was a success, and that the *End*
and as many strangers as can be induced
to compete, in another race this year
in just such a breeze.

The *Danville* followed the racers over
considerable portion of the course, and the
consensus was watched with interest from
the stately *Orion*, which lay at anchor a short
distance east of the town. The judges
were Messrs. S. S. Lauer, M. J. Jellet and
F. C. Ridley, from whose exertions the
getting up of the race resulted.

News Condensed.

—Caterpillars are ravaging Alabama.
—This is a great apple year in New Hamp-
shire.
—There are 136,000 Good Temples in Eng-
land.
—The free libraries of Birmingham contain
79,532 volumes.
—Gen Ben Butler has declared in favor of
the *Pease*.
—Three men were drowned at Cumberland,
Ont., on the 25th.
—London, England, consumed 100 tons of
American beef weekly.
—A fire broke out at Fish was burned
off the Dutch coast, and is a total loss.
—The Toronto *Telegram* says there were
10,000 strangers in Toronto yesterday.
—John Story, one of the oldest merchants
of Toronto, died on the 25th inst.
—An apple tree in full bloom is one of the
curiosities of Newburg.
—The cotton price trade is paying. A
large business is expected with South Amer-
ica.
—The Philadelphia Exposition has received
900,000 and admitted 3,600,000 people to
date.
—A car laden with hams near St. Catharines,
was burned on the 25th inst., with all
its contents.
—There was somewhat of a Friday night
Wall street yesterday among stockholders in
anticipate coal road.
—Mr. Cowan, formerly Huntington, has
abandoned with \$5,000, the proceeds of whose
gifts him to sell.
—A woman was bitten by a rattlesnake
near London, on the 24th inst., and died soon
afterwards.
—Small-pox is becoming scarce in England.
The last annual report gave only 600 cases for
the whole of England and Wales.
—The fifty immigrant farm laborers, from
England and Scotland, arrived in Toronto on
Monday evening.
—The rainfall in June was 1.59 inches, in
July 3.59 inches, and in August 1.01 or so
near it so to be understood.
—The rumor that Rev. D. J. Macdonell,
of Toronto, has accepted a call to a church in
Glasgow, seems to be untrue.
—Chicago produced \$1,000,000 in silver, \$10,
000 in gold, and \$1,000 in other metals, val-
ued at \$1,000,000, or \$2,000,000 yearly.
—Bishop Odo's buffalo, who was mar-
shaling work in a duff, died as a result of
a falling ladder from his harness \$10,000 in
bonds.
—The third army of rebellious for the
Union, have visited portions of Alabama, and
threaten the entire destruction of the cotton
crop.
—Notwithstanding the hard times our
American country and plenty of money to
spend on tonight's program and to support
all for the glory of their political leader.
—The Montreal Board of Trade have adopt-
ed a resolution in the empty freight opera-
tors in that direction with western de-
liveries.
—Convict named Wilson, escaped from
the Kingston Penitentiary on the 25th inst.
is a general escapee of the guard's watch by ladder,
and got off the wall, knocked him down,
and got off the wall.
—An English Company, with a capital of
ten million dollars have purchased the water
power at the crest falls of the Potomac, fear-
ing that the above Washington, General Gar-
field and other Massachusetts men were large
owners.

THE REGATTA.

A BIG BLOW AND A FAST RACE.

Peerless, Surprise and End the
Winners.

Admirers of the very popular sport of
yachting, who are numbered by the thou-
sands in this town, had the pleasure of wit-
nessing yesterday one of the finest races
which ever took place here between second
class yachts. The race was for a purse of
\$50, divided into three parts, \$25 to first boat,
\$10 to second and \$15 to third. The course
was from the Grand Junction dock to a
buoy on the middle ground off Northrop,
thence to a flag off Redwinville, and back
to the starting point, or fully thirty-four
miles. There were originally six entries,
but the *Katie Gray* was withdrawn, owing
to a death in the family. Mr. W. H.
Campbell, her owner, and the *Shenbury*
found the weather too heavy for her to
have any chance against the larger boats,
so she retired at the last moment, starting
with and accompanying the racers to the
Massachusetts Point.

The morning promised either rain or
wind, but the latter prevailed, and blew
strong enough to satisfy, and more than
satisfy, even the most ardent of yachtsmen
who it may be said are always wishing for
a "big blow." At the hour for the start—
10 o'clock a.m.—a nice breeze was begin-
ning to raise the white caps on the surface
of the bay, and much less time than usual
being cut to waste, the start was made
as follows:

End.....10:10-33
Peerless.....10:20-30
Surprise.....10:30-35
Lady Blanche.....10:23-25

The run down to Northrop was not
dead before the wind, but sufficiently so
to admit of balloon jibs being rigged out.
All carried gaff topsails, and the *End* and
Surprise got out their balloon jibs, thus
gaining some advantage over the *Peerless*,
which, however, very nearly held her own
with them, after several fruitless attempts
to set a similar sail. The *Surprise* came
down faster and faster after the start,
and after running about four miles the
Surprise got the better of her steering ap-
paratus, and nearly upset, which necessitated
the lowering of her balloon jib, which got
under her fore-foot and lost her at least
half a mile. The *Peerless* meanwhile over-
hauled the *End*, and rounded the North-
rop's buoy considerably distant in ad-
vance, whilst the *Surprise* had picked up
some of her lost ground. The *Lady*
Blanche had steadily fallen behind, and
was to all intents and purposes out of the
race, retiring after exchanging the point of
view. The three leaders, as they headed by
the wind for the long beat to Redwin-
ville, reefed up, and the *Perleus* and *End*
reduced their head sail to storm jibs, but
Surprise hung on doggedly to her full
jib. At this time the *Surprise* was
heavy, terrific puff blowing down on the
smart racers, which stood up well to their
work and made rapid progress through the
heavy choppy sea, sending the spray to
their eyes, heads and shoulders, and
making a barrel of water. Here the *Surprise*
did splendid work, weathering on her op-
ponents, and finally passing *Massachusetts*
with a lead of half a mile, *Peerless* second,
and *End* a good third, though apparently
falling slightly gradually. The *Surprise*
was bothered by a tug and tow just below
the point, and then, considering by failing
to weather them, having to pass to leeward.
Up the Bay the struggle continued, the
three leading at times, Bellevue passed
by the *Surprise* leading by, varying
accounts say, from half a mile to a
mile. All this advantage was lost in two
tacks west of the town, and the *Perleus*
succeeded in passing the *Redwinville* first
by some two minutes or more. Vic-
tory was thus matched out of the fire as it
were at the last moment, and Mr. Roy's
black favorite swept along, increasing her
lead on the run down, and passing the win-
ning mark, winner of the first prize at
2:37:15, the *End* following at 2:41:
00, or just 3 minutes and 10 seconds be-
hind. The *End*, not timed, was about
40 minutes later in arriving, having sailed
a good race. A fast race was sailed
on the bay, the winning boat making the
journey in 4 hrs. 17 min. 15 sec. Her
speed was thus nearly 12 miles an hour,
the distance actually sailed being about
50 miles. We have to say that the
race was a success, and that the *End*
and as many strangers as can be induced
to compete, in another race this year
in just such a breeze.

THE CANADIAN TEAM AT CREEDMOOR.

To the Editor of the *Intelligencer*.
Sir.—It is probable that few of your read-
ers are aware that a team has been selected
to represent at Creedmoor the Province of
Ontario in the International rifle match to
take place in September next. In this match
America, Scotland, Ireland, Australia, and
some of the Provinces of Canada, are to be
represented, and riflemen of all countries are
greatly interested in the event. Whoever
may be the winners, there is no doubt but
that our Province is worthily represented, and
no better team could have been selected.
In the practice made during the completion
of their selection they made a score only one
more than the highest team score ever
made. They will go to Creedmoor, therefore,
with a good prospect of returning as winners.
The contest being so important, it became
necessary to ask for aid to defray the expense
of the team. As a victory will no doubt be
claimed as a national triumph, it is only fair
that the public should be allowed to share
the expense attendant upon that triumph.
To raise a fund for the purpose it is proposed
that a subscription be solicited, limiting the
amount of each subscription to \$1, in order
that popular interest may be diffused as much
as possible.

I may state that the representatives of
Ontario left their country with \$10,000 in
their pocket, and instructions to uphold the
credit of their country at Wimbledon and
Creedmoor at any cost. One month's
run will enable the representatives of On-
tario to obtain the championship of the
Province at Creedmoor in a suitable manner.
Trusting that when subscriptions are asked,
that the applicant will receive a ready and
generous response.

I am, Sir, your obedient servant.

P. H. HAMBLBY.

August 24, 1876.

I may state that the representatives of
Ontario left their country with \$10,000 in
their pocket, and instructions to uphold the
credit of their country at Wimbledon and
Creedmoor at any cost. One month's
run will enable the representatives of On-
tario to obtain the championship of the
Province at Creedmoor in a suitable manner.
Trusting that when subscriptions are asked,
that the applicant will receive a ready and
generous response.

I am, Sir, your obedient servant.

LINE GLACE.

IT is a scientific combination of several of
the best articles known for laundry use.
Combines readily with Soap, and
Makes ironing easy by preventing the iron
sticking.
Gives to all fabrics a pearly finish.
Prevents blistering.
Can be used in either hot or cold water.
Is invaluable in doing up all this goods,
such as Lawn Dresses, Muslins, Cambrics,
Laces, &c.—increasing the stiffness of the
garments.
Infants clothing can be splendidly done up
with "Line Glace."
All fabrics will keep clean much longer
where "Line Glace" is used, as the dirt
will not adhere so readily.
Try it once and we guarantee you perfect
satisfaction.

For Halifax, daily, at 8 a.m., and 2 p.m.
The stages arrive in Belleville about noon
each day.

Daily Intelligencer.
BELLEVILLE, SATURDAY, AUG. 26.

Town and Vicinity.

Service to Toronto.—There will be
passing at the M. C. Church to Toronto
on Monday evening by Rev. J. M. Jones,
D.D., President of Albert College.
Sailed for Home.—The fine yacht
Orion, which arrived here on Thursday,
sailed for home last evening, the Dan-
iels accompanying her to Mill Point.
Arrived.—The steamship *Portland*, from
Liverpool, arrived at Father Point, at 7
this morning with 71 cabin, 6 intermediate
and 100 steerage passengers.
Laws Festival.—The music festival was
by the band of a battery last night was
very much enjoyed, it being the best heard
here in some time. There was a large at-
tendance, and everything passed off to the
satisfaction of those who were present.

A Quick Trip.—The Pictou *Gunite*
says: "The str. *Shannon* made the run
from Belleville to Pictou, on Friday last,
calling at four ports, in three hours and
three-quarters. This is certainly a good
time, and clearly indicates the *Shannon*
to be a fast steamer."

Season's Losses.—We are deeply pained
by the Pictou *Gunite*, to learn of the
serious illness of our esteemed friend,
Samuel Holmes, Esq., of Northport—an ill-
ness, which we have been given to under-
stand, would end fatally. This news will
be met with feelings of deep sorrow by a
very large circle of relatives and friends.

Boys' Matches.—The 40th Battalion
 Rifle Club will be represented by ex-
cellent shots at the matches of the Ontario
and Dominion Rifle Associations. As yet,
no men have been chosen, but that will
be determined by competition on the 26th
but. The 40th have always done well at
the matches in question, and we hope to
see this year excel all their former
achievements. The Hastings Rifle As-
sociation will also be represented.

The Deceased.—It is questionable if
"the oldest inhabitant" can remember a
parallel to the drought from which this sec-
tion of the country is at present suffering.
No rain has fallen at least once of any
importance—for several weeks; the coun-
try roads are covered thickly with dust;
the fields are baked like brick yards, and
vegetation is drooping and dying on all
hands. It is almost too late now for rain
to benefit the root crops.

A Gale.—A very heavy breeze of wind,
which increased at times to a furious gale,
blew here yesterday. Towards night the
wind increased, quarter to north-west,
from which quarter it piped merrily. A
large number of row boats and canoes, and
small boats, whose occupants had attended
the school picnic at Massena Point yester-
day, were storm-borne during the night,
and did not get home until this morning,
when the wind had moderated, though the
sea was yet high.

Ontario.—The death is announced of
Mr. James Knox, of Sidney, one of the
oldest settlers in this part of the country,
which occurrence took place at his resi-
dence on the 25th. Mr. Knox, who was a
native of Ireland, had been a resident of
Sidney for more than fifty years. He was
a large family to mourn his decease. Po-
litically Mr. Knox was a staunch Conserva-
tive, and in all relations of life he was
sensible and honorable, and consequently
highly respected by a wide circle of friends
and acquaintances.

The Centennial.—The Ottawa *Free
Press* says: "Mr. Ira Morgan, President
of the Agricultural and Arts Association,
'received orders yesterday requesting him
to attend at the Philadelphia Centennial ex-
position, during the display of live stock at
the Centennial. Mr. Morgan will visit
Philadelphia on Saturday, and will be
absent a few days later by Rev. Dr. Bur-
well, Jas. Young, M. P., and Mr. Bowell,
M. P., with him representing the Ontario
Agricultural and Arts Society."

Hart.—The magician M. Hart, who is
well known to our citizens, will appear at
Metropolitan Hall, Friday night, next, at
8 o'clock. Since his last visit here he
has been engaged in arranging a new entertain-
ment, and in all relations of life he was
sensible and honorable, and consequently
highly respected by a wide circle of friends
and acquaintances.

has been engaged in arranging a new entertain-
ment, and in all relations of life he was
sensible and honorable, and consequently
highly respected by a wide circle of friends
and acquaintances.

close of the entertainment it is like looking
at a kaleidoscope, in which an almost
endless variety of beautiful optical illusions
are produced. The rapid movement of
the audience, and dexterously quick move-
ment which results in the deception of the
perception, are marked features of the per-
formance.

The Waterloo Property.—The property
of Yvonne, in reference to the wedding, is
coming true. He writes to the Ottawa
Free Press: "The present cool and
windy spell however, agrees with my let-
ter published in the Ottawa *Free Press*.
about a week ago—that was that we
should have a weather until far into Sep-
tember, and fine weather in October."

Returned.—The yacht *Zeus* has re-
turned after a cruise to Cape Vincent,
Clayton, Alexandria, and Brooklyn. The
trip was a very pleasant one, and the *Zeus*
proved herself a staunch and comfortable
cruiser. Mr. Green, her owner and builder,
is justly proud of his boat. The *Zeus*, which
has been cruising among the islands, has
also returned.

A Mean Man.—Edmonton, Northern
berland Co., Ont., boasts the meanest man.
He is a storekeeper and charged one of his
young lady clerks, who rode with him to
Coburg, fifty cents for the ride and left her
at the last time. But the young lady
got more than square with him, she had
him arrested for carrying passengers with-
out a license, and he was fined twenty
dollars and costs.

Personal.—We had the pleasure of a
call this afternoon from Mr. George
Gibson, Assistant Chief Engineer of the
Deerp (Colorado) Fire Department, at 720
Main St. on Big Island, and we were
pleased to hear that he had made a
note that was a double record in the
history of his department. He is now on
his way to Philadelphia, where he will
represent the Firemen's Brigade in the
great meeting of Firemen which is to be held there shortly.

Lighthouse Rock.—The enormous wave,
which has made a good deal of study of
electrical phenomena, expresses a belief
that lightning rods are useless in electrical
storms, but that metal rods are an absolute
protection. He says that during a recent
storm several of the rods having been struck
to the point of contact with the metal rods,
when the damage done, the fluid dispersing
over the expanse of metal. This cor-
responds to hundreds of other cases that he
has examined, and he declares his conviction
that "the lightning rod, as a protection
in itself, is of no more value than a bodkin
would be to ward off the ball fired from a
Columbiad."

The School Picnic.—This event came
off with great success, there being an at-
tendance of nearly 2000, namely 1,000
children and about 500 adults. All were
conveyed safely by the Massena Point, the
Ontario Belle in two trips, the first of which
was made a little after the advertised time,
but the boat did not reach the Point until
after 1 o'clock on her second trip. So soon
as the passengers had landed, the boat was
proceeded with, all being satisfactorily
concluded with before 6 o'clock. The
picnic was a great success, and should the
Board of Education decide to give an ex-
cursion like this each year in future,
the movement will be highly popular, and
both among the pupils of the schools and
their parents.

Lake Ontario Levels.—The following,
in regard to the water level of Lake Ontario
for 1876, says the *Ontario Palladium*, is
obtained from the U. S. Engineer office,
 Oswego: The spring rise was completed on
June 1st, when the lake was four feet above
its extreme low stage. From this date, the
water nearly at a stand still, though the
tendency was slightly upward, until July
20th, when the maximum point was reach-
ed, at 4.4 feet above extreme low stage.
This is the highest level since June, 1870,
and is within 6.10 of extreme high stage.
Since July 20th there has been a steady
decline of about 1.10 in four days, and the
stage now reads 3.30 above extreme low
stage. This fall will continue until Decem-
ber, when the lake will be four feet above
its extreme low stage. The water level
will be reached, at a point from 1 to 1½ feet
above low water of last year.

Police Court.
(Before A. Diamond, Esq., M. P.)
SATURDAY, AUG. 26.
DRINKING WINDOWS.
John O'Connell was charged with breaking
the windows of Mr. Mayhew. The de-
fence was very contradictory, but the tes-
timony for the defence was of a very lame
character, and the Magistrate, expressing
his disbelieve in it, sentenced defendant to
two months' imprisonment.

The Montreal Jewellery Fraud.
THE MELLOR FAMILY ARRESTED.
HOW TO PAOK JEWELLERY.

PRELUDE. Aug. 25.—About nine o'clock
the morning word reached this place that
the Mellor family were taken into custody
by the police. Mr. Doucette, the official
of Montreal, was on the look out for them
at Franchette's, where the arrest of the
train took place in charge of the following
persons:—Mrs. Mellor, wife of the ab-
sconding Jeweller of Montreal, his mother,
two sisters, and three daughters. Mr. Doucette
was on the look out for them at Franchette's,
where the arrest of the train took place in
charge of the following persons:—Mrs. Mellor,
wife of the abscconding Jeweller of Montreal,
his mother, two sisters, and three daughters.

A CALL SOLICITED.
A. ROBERTSON
Bolleville, June 1st, 1876.

THE undersigned respectfully informs the public that he has disposed of the

and business heretofore carried on by him and M. Empoy, who will carry on the business in all its branches on the same premises and whom he confidently recommends to the patronage of his old customers and the public generally. In retiring from the business he wishes to return his sincere thanks to his friends and patrons for the patronage and support they have so long and so liberally given him.

R. P. FIDLER

THEM DEMONSTRATION

The work of preparation for the grand Conservative demonstration, which is to be held here on September 13th, goes on with spirit and energy. The efficient Committee to whom the arrangements have been entrusted are well forward with their work, which is rendered comparatively easy by the hearty and enthusiastic manner in which the members of the party have come forward to their assistance. Advice from Piston and Napanee assure us of a large attendance from Lennox and Prince Edward, and from all parts of our County the most favorable reports are received, whilst in town the feeling is of a most encouraging character.

The General Committee will meet on Saturday the 2nd, and again on the following Saturday, in the Intelligencer building, when they will be happy to meet and advise with such of the adherents of the party as may see fit to attend.

The Committee on decorations solicit the loan of flags and bunting, which will be required by Mr. Hugh Walker at his store and receipts given therefor.

Judging from the success already met with, and the feeling which has been evoked, there can be no doubt that the demonstration will come fully up to the expectations of its promoters.

THE MURDERERS' YOUNG.—By an order in Queen's Bench the two murderers Youngs, will be brought before the Court at Toronto, on Saturday, the 2nd Sept.

THE WELLINGTON SHIREVALLEY.—The *Guardian* thinks there is little doubt that the present Government of the Wellington will be offered and accepted by Mr. Peter Gow, M. P. P.

THE FISHERIES.—A Halifax telegram says: "Advice from Magdalen Islands to the 28th say that mackerel have struck in and the fishermen are doing well. Godfish continue very scarce."

THE PROVINCIAL EXHIBITION.—The entries of live stock, implements and machinery for the Provincial Exhibition and the fair, are showing a small increase over last year. The entries for the horticultural products, ladies' work, and fine arts, must be made by Saturday next.

CENTENNIAL RACE.—The second stage of the Centennial four-coared boat race has been decided, and the contest is now between the Beaverbrook of Albany, N. Y., and the London (England) crew. The Yale men, owing to their good work of yesterday, may be permitted to enter the final contest to-day. The Englishmen are still the favorites.

HOW TO HAVE GOOD TIMES.—The New York *Centinel* this week explains the cause of the "hard times." "The nation is spending money for intoxicating drinks than for all the bread and all the clothes it wears, all the books it reads, or all the churches it has over built. If every one of its accused drinking saloons could shut up, and every bottle was smashed, we should have good times in thirty days."

DEBATING THE SABBATH.—It is found that some of the contractors on the Intercolonial Railway in New Brunswick worked on the Sabbath as on any other day. Remonstrance from the local clergy and others failed. Sabbath observance having no effect, the ministers have a meeting and unanimously adopted a resolution, calling upon the Government to interfere and put an end to what they term a "disgrace to our civilization."

BEST TIME ON RECORD.—The mails by the *Provision* left Rimouski at half-past seven o'clock on Saturday morning under the charge of Mr. Wainwright, and arrived in Montreal at nine o'clock the same evening, thus delivering the English mail in Toronto on Sunday morning. This is the best time on record, and every bottle was smashed, we should have good times in thirty days."

ASSAULTING AN EDITOR.—A Toronto report says: "Hon. J. B. Robinson, M. P. for West Toronto, yesterday administered a severe thrashing to John Ross Robertson, proprietor of the *Bening Telegraph*, for publishing an extract from the *London Standard*, affecting his character as President and director of the Northern Railway. Robertson got out a warrant against Mr. Robinson for assault and a fine of \$5 and costs was indicated upon Mr. Robinson."

SIR JOHN MACDONALD.—The *St. Catharines Journal* says: "Just as Sir John Macdonald and Mr. Wainwright were leaving the Park yesterday evening in a carriage to take the special train to Toronto, Miss Helen Macdonald presented him with a magnificent bouquet of flowers. Sir John, with that gallantry to the sex for which he is famous, acknowledged the gift with his most gracious bow. He was evidently much pleased. On his way down Ontario street he met with a general cheering, and Sir John has much reason to feel satisfied. His cordial reception accorded him in this city, may his shadow never grow less."

THE CENTRAL FAIR.—The *Kingston News* says: "The arrangements for the 27th, 28th and 29th of September next, are progressing very favorably, and Mr. Simpson, the Secretary, assures us that, successful as was last year's Fair, this year will be better still. The collectors are meeting with good success in the canvases, and the prospects of the prize list are as good as certain. The number of exhibitors will probably be greater than last year, and the favorable rates have been obtained from the various railway and express companies for the conveyance of stock and goods from the exhibition. Mr. Simpson also informs us that a number of Americans are coming over to enter the competition, particularly in live stock. Should this be the case, it will be an incentive to our local breeders to do better than ever they did before. The success of the Central Fair is assured."

THE DROUGHT.—The great drought throughout the Province has given rise to many bush fires. Live stock is suffering in many places for the want of water, and there are driven long distances to obtain water. The want of rain is severely felt in New York State.

DOWNSIDE IN COAL.—Half a million tons of Pennsylvania coal was sold by auction in New York yesterday, at the instance of four of the great coal mining companies. The figures realized were very low, averaging between \$2 and \$3 per ton. A further decrease in prices is predicted.

News Condensed.

—Bush fires are raging fiercely about Toronto.

—The loss by the fire at Montebello, on the 25th, is \$25,000.

—The *Illustrated*, the novelist, is to go on the stage.

—Nine railroads are in process of construction in Texas.

—Goldsmith's new mill and house at Gravenhurst were burned on the 25th.

—The recent census of Montreal places the population at 145,000.

—Kingston has ordered a steam fire engine from Chatham.

—A new species of yellow fever is prevailing in Toronto.

—100 head of cattle will be shipped to-day to England by the *Scotian*.

—John Wilson, of Petrolia, was killed on the 25th, by his wagon running over him.

—The yacht *Orion* was at the Kingston shipyard on the 25th to receive a new rider.

—Kingston has four grain warehouses, with a capacity of 250,000 bushels.

—The mail in San Francisco closed in July \$4,000,000, the most ever done in a month.

—American horse buyers are operating extensively in London and neighborhood.

—Bachelors and lumber yard at Millville, were burned on the 25th. Loss \$15,000.

—One of the leading grocery merchants has taken fire to the snug little inn of two and a half million.

—A fire in San Francisco on the 25th, destroyed property to the amount of half a million dollars.

—The coffee crop of the world last year was 500,000,000 pounds, of which the United States imported over 300,000,000.

—Ottawa Magistrates impound young men who use profane language on the streets. Let Belleville follow the example.

—A farmer named Mitchell was killed by lightning on the 25th while ploughing in a field near London.

—Yesterday's paid admissions to the Centennial amounted to \$41,300. On September 2nd and 3rd the entrance fee will be 25 cents.

—The New Society of Ontario has adopted the matriculation curriculum of Toronto University for the primary examinations as students-at-law.

—John Patterson and Christian Reider were killed near St. Catharines by an engine of the Canada Southern striking the wagon and throwing them out.

—A physician advertises in the *Meriden*, Conn. newspaper that he has no more appetite for alcohol, and that he will present anybody who sells him any.

—It is reported from various manufacturing seats in Scotland that there is a turn for the better in the wool trade. The average, and prices are consequently higher.

—There are five floating elevators in Kingston, two of which have a capacity of 200 to 300 bushels per hour, the other three of 500 bushels capacity.

—A Swede has invented a dress, composed of two sections of canvas filled with water, which enables a man to plunge for several minutes into flames of fire.

—For the *Belleville Intelligencer*.

Father Forelli's thanks are tendered to his many kind friends who were present at the Sacred Concert given by St. Michael's Church last evening, in aid of Loretto Convent, now undergoing repairs. To his friends who were unable to be present, he says: "I am very thankful. They have always exhibited towards him and whatever he got up in his Church, either for charity or education, a truly liberal Christian spirit, for, indeed, he fears, beyond his personal desires, and he hopes to be ever grateful. They have shown by their presence in such large numbers, representing the elite of the community, and the intelligence of the South, that they are highly appreciative of his endeavors to procure for the female youth by again introducing the Ladies of Loretto, a high standard of education, believing with him that well trained ladies alone are capable of conveying to their own sex that polish and refinement which adapt the young lady to the twofold duty of wife and mother. To the ladies and gentlemen who were present, the choir and orchestra to me, the success of the entertainment, are like a hand also due. To Miss Fanning, whose charming voice, full of melody, and artistically trained, so delighted the audience, would say, may many be vouchsafed her to sing the prayers of God. To Mr. Gungas, who initiated and assisted to carry out the programme, a *bon jour* to his beloved country. And, finally, to his long tried friend, Prof. Whish, the able, the gentlemanly and the devoted popular organist of the Wesleyan Methodist Church, who has been again and again offered, coupled with the hope that the people of Belleville may long enjoy the services of this superior talent."

Belleville, Aug. 29th, 1876.

A Spading Machine.

A trial was made last week on Van Rensselaer Island of a spading machine, constructed after three years' experiment by the late William E. Blocker, of New York, and during the year since his death, by one, Henry Blocker, Jr. The work is done by a number of forks, each of two tines, worked by cams inside the drive wheels, which are enclosed to prevent churning of the displaced earth. The movement of the forks is similar to that of the forks of a hay loader. They enter the ground in front of the main shaft, and thence across back, lifting the soil very much as is done by the ordinary spading fork, and leaving the ground in precisely the same condition. The machine is operated by a strap three feet wide and over 8 inches deep, so fast as a pair of horses could walk out the displacement of earth. A large quantity of earth (equal to three furrows 12 inches wide and 8 inches deep) was too much for any ordinary team, and three horses were needed for this amount of work. The quality of the work was all that could be desired, leaving the field like a garden. If the machine had been made to work only 20 inches wide, any ordinary team could sit full ploughing, better for seeding in the spring, at once giving over, will be done by any ordinary team, and harrow in going over it several times.

On the 3rd instant the agent of the British Dynamite Company gave practical illustration of the immense power of this explosive at Cornhill Court. Three holes, 5 feet deep, were drilled on the floor of the Cornhill Court, and the cartridges were squeezed home into each hole, and fused inserted into each. The holes were then applied in the following order: three successive explosions took place, and the rock into fragments and disintegrating it was calculated, about 100 tons of solid rock.

Wanted to Lease.

A good dwelling house of about half a dozen rooms, furnished, and well situated, for lease. No children. Must be in a good location, and must have possession wanted by 1st September.
